

# MUHAMMAD ZAIN

🇨🇦 Canadian PR 📞 +1 (587) 577-8034 ✉️ [muhammad.zain1@ucalgary.ca](mailto:muhammad.zain1@ucalgary.ca) [LinkedIn](#) [GitHub](#) [Personal Portfolio](#)

## EDUCATION

### University of Calgary

Bachelor of Science in Software Engineering

Calgary, AB

September 2022 – April 2027

- **Relevant Coursework:** Algorithms & Data Structures, Object-Oriented Programming, Web & Database Systems, Machine Learning, Software Design & Testing, Operating Systems, Networks & Embedded Systems

## TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C++, JavaScript, SQL, HTML/CSS, RISC-V Assembly, LaTeX
- **Frameworks & Libraries:** React, Node.js, Next.js, Flask, Qt (C++), Java Swing, Tailwind CSS, Arduino
- **Databases & Tools:** MySQL, SQLite, Query Optimization (Indexes), Git/GitHub, CMake, Vercel

## PROJECTS

### CityX Subway Display System 🗺️

Java, Swing (FlatLaf), MySQL, REST APIs, JLayer, Multithreading

Calgary, AB

June 2025 – July 2025

- Engineered a real-time subway display with animated train tracking, rotating ads, and live weather/news updates.
- Orchestrated a modular Swing **CardLayout UI** with multithreaded control for seamless 10-second ad-to-map transitions.
- Designed a MySQL ad scheduler with indexed relevance rules, **accelerating query efficiency** and eliminating redundant lookups.
- Integrated wtr.in API and JLayer announcements with caching, retries, and fallbacks, ensuring **reliable updates**.

### Flight Operations Manager 🛫

C++17, Qt, MVC, SQLite/CSV, Data Visualization

Calgary, AB

February 2025 – March 2025

- Programmed a Qt desktop application to manage flights, passengers, and schedules within a scalable MVC structure.
- Built an interactive seat map with validation, conflict detection, and class pricing for **precise passenger assignments**.
- Optimized data lookups and storage, reducing query time by **roughly 40%** on **500+ passenger datasets**.
- Resolved segmentation faults and stabilized workflows to maintain **99.9% uptime** during extended operations.

### TechVista Inc 🏢

React, Flask, SQLite, REST APIs, Responsive UI

Calgary, AB

October 2024 – December 2024

- Delivered a full-stack store with authentication, product catalog, cart workflows, and a responsive animated UI.
- Implemented Flask REST endpoints with validation, error handling, and **parallel request processing** to improve rendering.
- Crafted reusable React components with hooks/context, **cutting load times** and enhancing state handling.
- Introduced profile dropdown with cart preview and guarded actions, **strengthening UX** and securing guest sessions.

### Art Museum Data Manager 🎨

Python, MySQL, SQL Scripting, Role-Based Access Control

Calgary, AB

February 2024 – April 2024

- Structured a fully normalized MySQL schema for artworks, artists, loans, and staff with strict referential integrity.
- Programmed a Python CLI to provision accounts and manage secure role-based access for admins and employees.
- Enforced business rules with trigger-based SQL safeguards for updates, deletions, and overdue loan returns.
- Automated SQL scripts to seed data, create roles, and generate reports, **streamlining workflows**.

## EXPERIENCE

### Best Buy Canada

Mobile and Smart Living Advisor

Calgary, AB

May 2023 – September 2024

- Delivered tailored smart home and mobile service, driving **\$70K+ monthly revenue** through specialized consultations.
- Ranked **#2 in team performance**, excelling in solution-based selling and cross-team collaboration with Geek Squad.
- Completed **55+ telecom activations**, resolving technical issues and ensuring seamless device integration for clients.

## LEADERSHIP

### AKHSS Science & Commerce Olympiad

Project Lead

Karachi, PK

October 2019 – December 2019

- Directed the Laser Li-Fi project, showcasing high-speed light-based data transfer and securing **3rd place in Physics** among nationwide competitors.
